DESIGN - SUPPLY - BUILD

**WSR3D 1:32 SLOT CAR CHASSIS TURNING TOOLS SCENERY AND ACCESSORIES DESIGNS**

**DATE: 27th July 2023**

Our entire Chassis range is designed to fit the body shell with a degree of accuracy to mirror the original chassis shape.

Some Chassis's have new side body mounting systems for improvement performance and balance, when its not practical to use the bodies original fixing posts. Other secure by using an adapter and new body posts. Original body fixing points are used when its practicable.

All chassis are supplied with all the fixing Body Screws and Grubs for Axle adjustment. Axle Spacers and Various Shims are also provided to adjust ride height for the body if needed.

Our new chassis development is called Guide Flex System (**GFS**) were the adjustable guide length it attached to the motor mount, this moves in the direction of the pod giving you a smoother ride. This system can be added to a wide range of our chassis designs

Drop us a line on which model you are interested in adapting for the **GFS**

**All kits are provided with parts list, recommended upgrade parts and build information.**
